

CHINTU KUMAR

Aspiring Data Analyst | Python | SQL | Power BI

chintukumaredu00@gmail.com | +91 7763917713 | [linkedin.com/in/chintu-kumar-767909190](https://www.linkedin.com/in/chintu-kumar-767909190) | github.com/ChintuYadav001

100+ SQL Problems Solved • 10,000+ Records Analyzed • 3 End-to-End Analytics Projects

CAREER OBJECTIVE

B.Tech Computer Science (AI & DS) student with a strong foundation in Python, SQL, Excel, and Power BI. Skilled in data cleaning, exploratory data analysis (EDA), data visualization, and dashboard development. Seeking a Data Analyst opportunity to apply analytical skills, solve business problems, and contribute to data-driven decision-making.

TECHNICAL SKILLS

- Programming Languages: Python, SQL
- Python Libraries: Pandas, NumPy, Matplotlib, Seaborn
- Data Analysis: Exploratory Data Analysis (EDA), Data Cleaning, Data Wrangling, Statistical Analysis
- Data Visualization & BI Tools: Power BI (Dashboards, DAX basics: CALCULATE, SUMX, RANKX), Microsoft Excel (Pivot Tables, VLOOKUP, INDEX-MATCH, Charts)
- Database Management: MySQL (Joins, Subqueries, Aggregate Functions, Window Functions), Data Modeling, ETL Basics
- Business Analytics: KPI Analysis, Business Intelligence, Dashboarding, Statistical Analysis, Data Interpretation
- Tools & Technologies: Jupyter Notebook, Excel, Power BI, Git/GitHub
- Core Strengths: Problem Solving, Analytical Thinking, Communication, Team Collaboration

EXPERIENCE

Data Analyst Intern | Alfido Tech (Remote)

Aug 2026 – Oct 2026

- Cleaned and preprocessed 5+ raw datasets (50,000+ rows total) using Python (Pandas, NumPy), fixing missing values, duplicates, and outliers to improve data quality by an estimated 30%.
- Performed feature engineering and exploratory data analysis (EDA) across 5 business datasets to identify KPIs, trends, and actionable insights, presented to a 4-person project team.
- Built 10+ visualizations and summary reports using Matplotlib and Seaborn, translating raw data into clear, decision-ready insights for stakeholders.
- Automated repetitive data-cleaning steps with reusable Python functions, cutting manual processing time by roughly 40%.

PROJECTS

Customer Behavior & RFM Segmentation Analysis | Python, Pandas, NumPy, Matplotlib, Seaborn

- Cleaned and analyzed 10,000+ customer transaction records, engineering RFM (Recency, Frequency, Monetary) features to segment customers into 5 value tiers.
- Identified high-value and at-risk segments (~20% of customers driving 60%+ of revenue), surfacing retention opportunities for targeted marketing.

Sales Performance Analysis | Python, SQL, Pandas, Matplotlib, Seaborn, Power BI

- Wrote SQL queries (joins, aggregations, window functions) to extract and summarize sales, revenue, and profit across regions and categories using the Superstore dataset (9,800+ records).
- Built an interactive Power BI dashboard (5+ visuals) highlighting top products and seasonal trends, surfacing 3+ actionable improvement areas.

Website Traffic Analysis | Python, Pandas, NumPy, Matplotlib, Seaborn

- Cleaned and analyzed website traffic data spanning thousands of sessions, covering users, bounce rate, and average session duration.
- Identified top 5 landing/exit pages and referral sources, recommending changes projected to improve conversion and engagement.

EDUCATION

B.Tech, Computer Science (AI & DS) | IIMT Engineering College (AKTU)

2023 – 2027

CGPA: 7.2

XII (CBSE) | Paramount Academy

2023

Percentage: 67.6%

X (CBSE) | Paramount Academy

2021

Percentage: 65.4%

ACHIEVEMENTS & CERTIFICATIONS

- Completed the Google Data Analytics Professional Certificate (Coursera), with hands-on projects in EDA, data cleaning, and visualization.
- Solved 100+ SQL problems on LeetCode, strengthening query writing and analytical thinking.
- Earned SQL certification from HackerRank, validating database and query skills.
- Built interactive dashboards in Power BI through a hands-on micro-course.
- Completed Python for Data Science (Infosys Springboard), applying Pandas and NumPy to real datasets.
